

## ILLUMINATIVE AND REFLECTIVE SAFETY HORSE GARMENT

### ABSTRACT OF THE DISCLOSURE

5 A safety turn out garment for a horse to wear, *inter alia*, during hunting season and at night, is made from highly visible (e.g., blaze orange) fabric, which may be made from mesh fabric, and has highly reflective strips affixed thereto. Such garment may be made into an equine fly mask or an equine sheet/blanket, which retains the function of conventional equine fly mask or turn out sheet, yet provides better safety for the horse.
